

HAZARD IDENTIFICATION: Discuss the following questions with workers...

Can I touch, ingest or inhale a hazardous substance, or be exposed to anything which could harm my vision, hearing or health, short or long term?

Can I get caught in or entangled with moving parts, or be crushed or trapped by anything?

Can I be hit or impacted by anything?

Can I come into contact with something that could impact, cut, puncture or abrade me?

Can I slip, slide, trip or fall?

Can I come in contact with high pressure, electricity or excessive heat?

Can I cause a fire, property damage or harm to the environment?

Can I strain, sprain, tear or injure a ligament, muscle, or nerves?

Can I be put at risk by natural disasters, or adverse or changing weather conditions?

Can my health or safety be affected by human, social or mental factors?

Can my work put others at risk, now or in the future?
